

MARMETAL

ARCHITECTURAL & DECORATIVE BRASS MATERIALS

Marmetal Industries stocks and distributes an extensive range of C280 (Muntz Metal) sheet and plate in a variety of thicknesses to support architectural, decorative, industrial, and fabricated applications. C280 brass provides an outstanding combination of strength, corrosion resistance, and formability, making it a preferred choice for demanding environments such as marine hardware, architectural paneling, and premium hardware components.

KEY ADVANTAGES OF C280 BRASS:

- Exceptional corrosion resistance, particularly in marine and urban environments
- Excellent cold-working and hot-working properties
- Attractive golden color ideal for visible and decorative applications
- Strong mechanical properties with reliable long-term durability

AVAILABLE FORMS:

- Sheet
- Plate
- Tempers available: H01, H02, M20
- Wide range of thicknesses and widths in stock for fast delivery

APPLICATIONS:

- Architectural cladding and trim
- Marine and shipbuilding components
- Heat exchanger plates
- Hardware, fixtures, and precision-formed parts
