

MARMETAL

WATERJET CUTTING CAPABILITIES

PRECISION WATERJET CUTTING SERVICES

Marmetal Industries offers high-precision waterjet cutting services designed to support a wide range of industries including defense, marine, heat exchanger, industrial manufacturing, and custom fabrication. Our water jet allows us to cut complex shapes with exceptional accuracy while maintaining the integrity and properties of the material.

WHY WATERJET CUTTING?

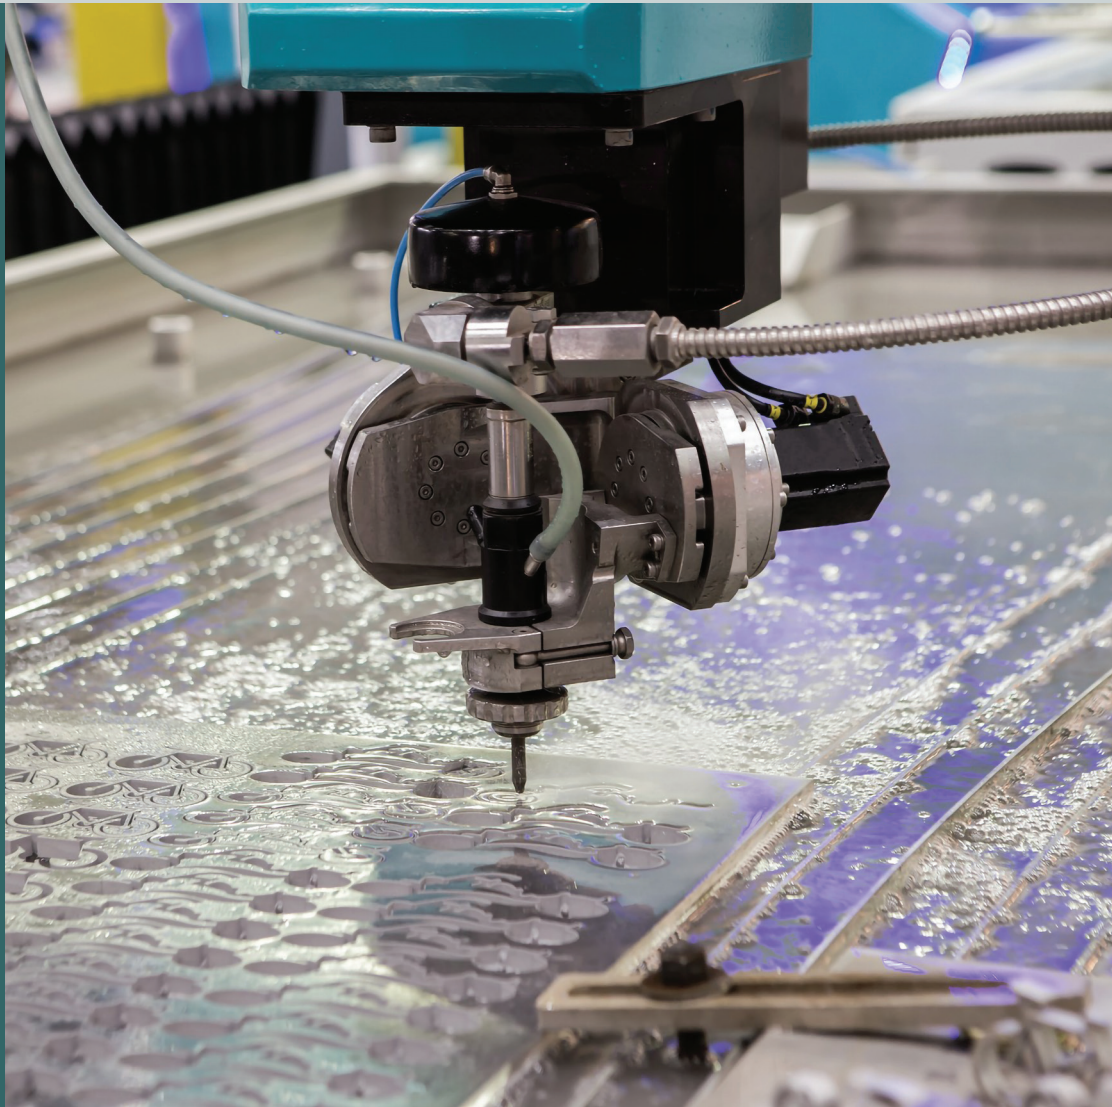

Marmetal Industries offers high-precision waterjet cutting services designed to support a wide range of industries including defense, marine, heat exchanger, industrial manufacturing, and custom fabrication. Our water jet allows us to cut complex shapes with exceptional accuracy while maintaining the integrity and properties of the material.

MARMETAL'S WATERJET CAPABILITIES:

- Cutting thicknesses up to 10" inches thick depending on material
- Large format cutting bed to accommodate oversized plate
- Ability to process copper alloys, nickel alloys, stainless steels, aluminum, titanium, and more
- High repeatability for production runs or one-off custom parts
- CAD file integration for fast and accurate job setup

APPLICATIONS:

- Precision blanks and near-net-shape components
- Architectural and decorative shapes
- Gasket and seal plates
- Marine and defense components
- Industrial machine parts
- Prototype development and custom fabrication

PARTNER WITH MARMETAL

With decades of experience in specialty metals and value-added processing, Marmetal Industries provides fast turnaround, dependable quality, and expert support for all your waterjet needs.
